

## About

TRICO ISRAEL LTD. is an exclusive sales representative of manufacturers in the areas of motion components, motion systems, electronics, optics and opto mechanical system. We strive to achieve customer satisfaction.

Trico Israel Ltd provides solutions ranging from simple applications to challenging custom made engineering applications.

Trico Israel Ltd has been established in 1991 to serve the growing need for such support in the high tech industry in Israel . Trico specializes in demanding engineering applications. For the past 15 years Trico has specialized in serving the needs of Israeli firms that require precision motion control components and systems, as well as optical and opto-mechanical systems.

We have built a base of the world's leading firms that supply these markets and pride ourselves on excellent service, as well as a tradition of listening and responding carefully but accurately to our client's needs.

Trico has grown, and now offers the support of a team of highly qualified and dedicated sales people and engineers. Trico can support customers on applications ranging from mechanical design to sophisticated servo systems down to the range of nano level and pico level motion.
